

Customer Operation and Safety Guide

Rug Doctor Support: 1-800-784-3628 | www.rugdoctor.com

Machine/Tool ID:	WDNI-1 Wet Dry Vacuum
Vendor:	Rug Doctor
Vendor Website:	www.rugdoctor.com
Mfg. Support Phone No.:	1-800-784-3628

Tool Application: Clean up your home improvement jobs with commercial-grade suction that tackles dirt, debris, spills and floods.

Operation Guide: Read all instructions completely before you begin.

USER MUST CAREFULLY READ AND FULLY UNDERSTAND ALL INSTRUCTIONS BEFORE USING THIS MACHINE. Before operating the machine (including any attachments), renter agrees to fully read, understand, and follow all safety warnings and instructions set forth below, which can be found on Rug Doctor's website (www.rugdoctor.com).

USING THE MACHINE

1	Read all instructions carefully before using this machine. Check that the electrical switch is switched off (in position 0) and check that the filters are installed in the machine.
2	Connect the suction hose into the suction inlet at the machine by pushing the hose forward until it fits firmly in place at the inlet.
3	Connect the curved hand tube with the suction hose, twist the tool to ensure it is properly fitted.
4	Connect the extension tubes (individually) with the hose handle, twist the tubes to ensure they are properly fitted.
5	Attach suitable nozzle/tool to the extension tube. Choose tool depending on what type of material that is to be picked-up. Extension Tubes are used to provide you with more reach and/or to use while standing. Crevice Tool: Great for small spaces Floor Tool: Ideal for larger areas Upholstery Tool: Great for sofa, stairs, chairs and more
6	Connect the power cord plug into a proper electrical outlet.
7	Put the power switch into POSITION I (power on) in order to start the motor. Turn I: Activate the Machine (Power On) Turn 0: Stop the Machine (Power Off)
8	Machine is equipped with a semi-automatic filter cleaning system, Push & Clean. The filter cleaning system should be actuated before you begin work and when suction performance is no longer sufficient. Regular use of the filter cleaning feature maintains suction performance and increases the lifetime of the filter.
9	If suction performance drops: 1. Turn power switch to position "I" (Power On). 2. Close the nozzle or suction hose opening with the palm of your hand. 3. Press and release filter cleaning button five times to start filter cleaning. The resulting stream of air removes dust from the slats of the filter elements.

10	Machine is equipped with a water level limit system which shuts off machine when the maximum liquid level is reached. When this occurs, switch off the machine. Disconnect the machine from the electrical outlet and empty the container. CAUTION: Never pick up liquids or dry materials without the water level limit system and filter in place. Do not pick up hazardous or flammable liquids. If foam appears, stop work immediately and empty the container. Before emptying the container, unplug the machine and wear the proper personal protective equipment.
11	To empty container, disconnect the hose from the inlet by pulling out the hose.
12	Release the latches by pulling them outwards so that the motor top is released.
13	Lift up the motor top and separate from the container.
14	Always empty and clean the container after picking-up liquids and dry materials.
15	Empty by tilting the container backwards or sideways. Dispose materials in accordance with legal regulations.
16	Put back the motor top to the container. Secure the motor top with the latches.
17	When finished cleaning, prepare machine and tools for return.
18	To clean filter, turn power switch to position "I" (Power On). Close the nozzle or suction hose opening with the palm of your hand. Press and the release filter cleaning button five times to start filter cleaning. The resulting stream of air removes attached dust from the slats of the filter elements.
19	To clean machine and tools, disconnect the hose from the inlet by pulling out the hose. Release the latches by pulling them outwards so that the motor top is released. Lift up the motor top and separate from the container. Always empty and clean the container after picking-up liquids and dry materials. Empty by tilting the container backwards or sideways. Dispose materials in accordance with legal regulations. Use mild soap and damp cloth to wipe and clean out the inside of container, bottom side of the motor top, hose and each tool. Dry the inside of container, bottom side of the motor top, hose and each tool. Put back the motor top to the container. Secure the motor top with the latches. Coil up hose. Put coiled hose and all cleaned tools in the Tool Bag before returning to store. Use handle to roll machine to desired location and to lift or carry machine.

Safety Guide: Read all instructions completely before you begin.

USER MUST CAREFULLY READ AND FULLY UNDERSTAND ALL INSTRUCTIONS BEFORE USING THIS MACHINE. Before operating machine (including any attachments) (collectively, the "machine"), renter agrees to fully read, understand, and follow all safety warnings and instructions set forth below and in the operator's manual, which can be found on Rug Doctor's website (www.rugdoctor.com). Machine may contain water. When using machine (including any attachments), basic precautions should always be followed, including the following:

 **WARNING** This product can expose you to chemicals including Di(2-ethylhexyl)phthalate (DEHP), which is known to the State of California to cause birth defects or other reproductive harm, and lead, which is known to the State of California to cause cancer, birth defects, and other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

 **WARNING TO REDUCE RISK OF FIRE, ELECTRIC SHOCK OR INJURY:**

- Read all instructions on the Rental Agreement, on machine, and in the Operator's Manual before using machine. Use only as described on the Rental Agreement, on machine, and in the applicable Operator's Manual and only with the manufacturer's recommended attachments or components.
- BEFORE YOU PLUG IN MACHINE, check the rating plate at machine to see if the rated voltage agrees within 10% of the voltage available.

- Connect machine to a properly grounded outlet only. See applicable Operator's Manual and "Grounding Instructions" below.
- Store indoors.
- Do not use in outside areas at low temperature.
- **DO NOT** use to pick up flammable or combustible materials or liquids such as gasoline, or certain paints. **DO NOT** use in areas where they may be present.
- **DO NOT** use to pick up anything that is burning or smoking, such as cigarettes, matches or hot ashes.
- **DO NOT** place in or pick up anything with this machine that is a caustic or toxic material, such as bleach, ammonia, toilet bowl cleaners or drain cleaners.
- **DO NOT** pick up hard or sharp objects such as glass, nails, screws, coins, etc.
-
- Do not use without dust bag and/or filters in place.
- Use extra care when cleaning on stairs.
- Machine may not be used as a water pump. Machine is intended for vacuuming air and water mixture.
- Provide for good ventilation at the working place.
- Do not use machine as a ladder or step ladder.
- If foam or liquid escapes from machine, switch off immediately.
- Never operate machine without all components properly connected to machine. Examine machine before use for visible deterioration, such as abrasions, cracks, splits, and the like.
- Never operate machine with broken, damaged, or missing electrical and mechanical parts (including the power cord). If machine is not operating as it should, has been dropped, damaged, left outdoors, dropped into water, or if parts are damaged, broken, or missing, do not use machine, immediately return to store, and notify Rug Doctor at (800) 784-3628. Do not attempt to repair any damaged or broken machine under any circumstances.
- Before using machine, understand how to turn machine on and off and be thoroughly familiar with machine controls and how to operate them.
- Stay alert - watch what you are doing.
- Do not operate machine when fatigued or under the influence of alcohol or drugs.
- Do not allow to be used as a toy. Do not operate machine near children or pets. Never allow children to operate machine. Keep operating area clear of all debris, people and pets.
- Do not stand on unstable surfaces. Do not overreach or stand on unstable support. Keep good footing and balance at all times.
- Power connections and plug should be kept dry and off the ground. Do not run machine over electrical outlets that may be located on the floor.
- Do not touch plug or operate machine with wet or sweaty hands. Wear rubber-soled shoes when cleaning.
- Do not submerge machine, expose to rain, or place machine in standing water.
- Do not leave machine when it is plugged in or while it is powered on. Unplug from the wall outlet when not in use and before cleaning.
- Always turn off machine before connecting or disconnecting any applicable attachment.
- Always move switch on machine to off position before connecting or disconnecting cord to electrical outlets.
- Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run machine over cord. Keep cord away from heated surfaces.
- **DO NOT** cut or splice the machine's cord.
- **DO NOT** modify earthed plug.
- Do not use an extension cord. Failure to follow this instruction may expose Renter to the possibility of electric shock, personal loss or injury and/or death.
- Do not use bleach, dye, laundry detergents, cleaning powders, harsh solvents or chemicals, or any non-Rug Doctor products with machine as permanent damage to your property may result.
- Do not use, spray, place or pick up flammable or corrosive liquids, acids and solvents in machine or use machine in an area where combustible dust, liquids, or vapors are present. Do not place in or pick up anything with machine that is a caustic or toxic material, such as bleach, ammonia, toilet bowl cleaners, or drain cleaners. An electric spark could cause an explosion resulting in serious personal injury or even death.

Customer Operation and Safety Guide

Rug Doctor Support: 1-800-784-3628 | www.rugdoctor.com

- Never cover machine during operation, machine needs to allow free air cooling. Keep hair, loose clothing, fingers and all parts of the body away from openings and moving parts. Do not put any objects into openings or use with opening blocked. Keep openings free of dust, lint, hair, and anything else that could reduce the flow of air.

GROUNDING INSTRUCTIONS

This machine must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

WARNING Improper connection of the equipment-grounding conductor can result in a risk of electrical shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the machine. Do not use if the plug does not fit the outlet. Machine is for use on a nominal 120-volt circuit and has a grounded plug as illustrated here. Make sure the machine is connected to an outlet having the same configuration as the plug. Do not use an adapter or extension cord.

1 Safety instructions

This document contains the safety information relevant for the appliance along with a quick reference guide. Before starting up your machine for the first time, this instruction manual must be read through carefully. Save the instructions for later use.

Further support

Further information on the appliance can be found on our web site at www.Nilfisk.com. For further queries, please contact the Nilfisk service representative responsible for your country. See reverse of this document.

1.1 Symbols used to mark instructions

DANGER

Danger that leads directly to serious or irreversible injuries, or even death.

WARNING

Danger that can lead to serious injuries or even death.

CAUTION

Danger that can lead to minor injuries and damage.

1.2 Instructions for use

The appliance must:

- only be used by persons, who have been instructed in its correct usage and explicitly commissioned with the task of operating it
- only be operated under supervision
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.
- Children shall be supervised to make sure that they do not play with the appliance.
- Do not use any unsafe work techniques.
- Never use the appliance without a filter.
- Switch off the appliance and disconnect the mains plug in the following situations:
 - Prior to cleaning and servicing
 - Prior to replacing components
 - Prior to changing over the appliance
 - If foam develops or liquid emerges

Besides the operating instructions and the binding accident prevention regulations valid in the country of use, observe recognised regulations for safety and proper use.

For Dust Class L machines (with type designation VHS 40 LC, VHS 42 LC) following applies:

Before starting work, the operating staff must be informed on and trained within:

- use of the machine

- risks associated with the material to be picked up
- safe disposal of the picked up material

1.3 Purpose and intended use

This mobile dust extractor is designed, developed and rigorously tested to function efficiently and safely when properly maintained and used in accordance with the following instructions.

This machine is intended for commercial use, for example in hotels, schools, hospitals, factories, shops, offices and rental businesses.

This machine is also suitable for industrial use, such as e.g. plants, construction sites and workshops.

Accidents due to misuse can only be prevented by those using the machine.

READ AND FOLLOW ALL SAFETY INSTRUCTIONS.

The appliance is suitable for picking up dry, non-flammable dust and liquids.

Any other use is considered as improper use. The manufacturer accepts no liability for any damage resulting from such use. The risk for such use is borne solely by the user. Proper use also includes proper operation, servicing and repairs as specified by the manufacturer.

For Dust Class L machines (with type designation VHS 40 LC, VHS 42 LC) following applies:

The appliance is suitable for picking up dry, non-flammable dust and liquids, hazardous dusts with OEL¹⁾ value > 1mg/m³.

Dust Class L (IEC 60335-2-69).

The dusts which belong to this class have OEL¹⁾ values > 1mg/m³.

For machines intended for the Dust Class L, the filter material is tested. The maximum degree of permeability is 1% and there is no special requirement for disposal.

For dust extractors, ensure adequate air change rate L, when the exhaust air is returned to the room. Observe national regulations before use.

1.4 Electrical connection

- It is recommended that the machine should be connected via a residual current circuit breaker.
- Arrange the electrical parts (sockets, plugs and couplings) and lay down the extension lead so that the protection class is maintained.
- Connectors and couplings of power supply cords and extension leads must be watertight.

1.5 Extension lead

1. As an extension lead, only use the version specified by the manufacturer or one of a higher quality.

2. When using an extension lead, check the minimum cross-sections of the cable:

Cable length	Cross section	
	< 16 A	< 25 A
up to 20 m	1.5 mm ²	2.5 mm ²
20 to 50 m	2.5 mm ²	4.0 mm ²

1.6 Guarantee

Our general conditions of business are applicable with regard to the guarantee.

Unauthorised modifications to the appliance, the use of incorrect brushes in addition to using the appliance in a way other than for the intended purpose exempt the manufacturer from any liability for the resulting damage.

1.7 Important warnings

WARNING

- To reduce the risk of fire, electric shock, or injury, please read and follow all safety instructions and caution markings before use. This machine is designed to be safe when used for cleaning functions as specified. Should damage occur to electrical or mechanical parts, the machine and / or accessory should be repaired by a competent service center or the manufacturer before use in order to avoid further damage to the machine or physical injury to the user.
- Do not leave the machine when it is plugged in. Unplug from the socket when not in use and before maintenance.

- Outdoor use of the appliance shall be limited to occasional use.
- Do not use with damaged cord or plug. To unplug grasp the plug, not the cord. Do not handle plug or machine with wet hands. Turn off all controls before unplugging.
- Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run machine over cord. Keep cord away from heated surfaces.
- Keep hair, loose clothing, fingers and all parts of the body away from openings and moving parts. Do not put any objects into openings or use with opening blocked. Keep openings free of dust, lint, hair, and anything else that could reduce the flow of air.
- Do not use in outside areas at low temperature.
- Do not use to pick up flammable or combustible liquids such as gasoline, or use in areas where they may be present.
- Do not pick up anything

that is burning or smoking, such as cigarettes, matches or hot ashes.

- Use extra care when cleaning on stairs.
- Do not use unless filters are fitted.
- If the machine is not working properly or has been dropped, damaged, left outdoors, or dropped into water, return it to a service center or dealer.
- If foam or liquid escapes from the machine, switch off immediately.
- The machine may not be used as a water pump. The machine is intended for vacuuming air and water mixtures.
- Connect the machine to a properly earthed mains supply. The socket outlet and the extension cable must have an operative protective conductor.
- Provide for good ventilation at the working place.
- Do not use the machine as a ladder or step ladder. The machine can tip over and become damaged. Danger of injury.
- For standard machines (with type designation VHS 40, VHS 42) follow-

ing applies: This machine is not suitable for picking up hazardous dust.

- Only use the socket outlet on the machine for purposes specified in the instructions.

2 Risks

2.1 Electrical components

DANGER

-  The upper section of the machine contains live components. Contact with live components leads to serious or even fatal injuries. Never spray water on to the upper section of the machine.

DANGER

-  Electric shock due to faulty mains connecting lead. Touching a faulty mains connecting lead can result in serious or even fatal injuries.
- Do not damage the mains power lead (e.g. by driving over it, pulling or crushing it).
 - Regularly check whether the power cord is damaged or shows signs of ageing.
 - If the electric cable is damaged, it must be replaced by an authorized

Nilfisk distributor or similar qualified person in order to avoid a hazard.

- In no circumstances should the power supply cord be wrapped around fingers or any part of the operators person.

2.2 Hazardous dust

WARNING

 Hazardous materials. Vacuuming up hazardous materials can lead to serious or even fatal injuries. The following materials must not be picked up by the machine:

- hot materials (burning cigarettes, hot ash, etc.)
- flammable, explosive, aggressive liquids (e.g. petrol, solvents, acids, alkalis, etc.)
- flammable, explosive dust (e.g. magnesium or aluminium dust, etc.)

For standard machines (with type designation VHS 40, VHS 42) following further applies: The following materials must not be picked up by the machine:

- Hazardous dust.

2.3 Spare parts and accessories

CAUTION

 Spare parts and accessories. The use of non-genuine spare parts, brushes and accessories can impair the safety and or function of the appliance.

Only use original spare parts and accessories from

Nilfisk. Spare parts that can affect health and safety of the operator and or function of the appliance, are specified below:

Description	Order No.
Flat filter PTFE, 1 pcs.	107413540
Fleece filter bag, 5 pcs.	107413547
Disposal bag, 5 pcs.	107417821
Long Life filter bag, 1 pcs.	107413556
Motor cooling air filter PET, 1 pcs.	107413541

2.4 In explosive or inflammable atmosphere

CAUTION

 This machine is not suitable for use in explosive or inflammable atmospheres or where such atmospheres are likely to be produced by the presence of volatile liquid or inflammable gas or vapour.

3 Control / Operation

CAUTION

 Damage due to unsuitable mains voltage. The appliance can be damaged as a result of being connected to an unsuitable mains voltage.

- Ensure that the voltage shown on the rating plate corresponds to the voltage of the local mains power supply.

3.1 Starting and operating of the machine

Check that the electrical switch is switched off (in position 0). Check that suitable filters are installed in the machine. Then connect the suction hose into the suction inlet at the machine by pushing the hose forward until it fits firmly in place at the inlet. Then connect the tubes with the hose handle, twist the tubes in order to ensure that they are properly fitted. Attach suitable nozzle to the tube. Choose nozzle depending on what type of material that is to be picked-up. If used for dust extraction in connection with dust producing tool then connect end of suction hose with appropriate adapter. Connect the plug into a proper electrical outlet. Put the electrical switch into position I in order to start the motor.

Turn I: Activate the machine
Turn 0: Stop the machine

Turn I: Activate the machine – turn clock wise for speed control
Turn 0: Stop the machine
Turn : Activate Auto-On/Off operation – turn counterclockwise for speed control

Turn I: Activate the machine
 Turn 0: Stop the machine.
 Permanent power on socket.
 Turn : Activate Auto-On/Off operation.
 Turn I+ Off: Activate the machine with deactivated auto-filter cleaning function
 Turn + Off: Activate Auto-On/Off operation with deactivated automatic filter cleaning function.
 Speed control operation on separate turning knob

3.2 Auto-On/Off socket outlet for power tools¹⁾

CAUTION

Appliance socket.*

The appliance socket is designed for electrical auxiliary equipment; see technical data for reference.

- Prior to plugging in an appliance, always switch off the machine and the appliance that is to be connected.
- Read the operating instructions to the appliance to be connected and observe the safety notes contained in these.

An appliance socket with earthing contact is integrated in the machine. An external power tool can be connected there. The socket features permanent power on, when the electrical switch is in position 0, i.e. the machine can be used as an extension cord. In position the machine can be switched on and off by the power tool connected. Dirt is picked up from the source of dust immediately. To comply with regulations, only approved dust producing tools should be connected.

The maximum power consumption of the connected electrical appliance is stated in section "Specifications".

Before turning the switch to position ensure that the tool connected to the appliance socket is switched off.

3.3 Push&Clean¹⁾

The "PC" machine is equipped with a semi automatic filter cleaning system, Push&Clean. The filter cleaning system must be actuated latest when the suction performance is no longer sufficient. Regular use of the filter cleaning feature maintains suction performance and increases the lifetime of the filter. For instruction see quick reference guide.

3.4 InfiniClean¹⁾

The "IC" machine is equipped with an automatic filter cleaning system, InfiniClean. A frequent cleaning cycle will automatically run during operation to ensure that suction performance is always at its best. If suction performance decreases or in extensive

dust applications a manually filter cleaning operation is recommended:

- Switch off the machine
- Close the nozzles or suction hose opening with the palm of your hand.
- Turn the switch to position „I“ and let the machine operate at full speed for approx. 10 seconds with the suction hose opening closed.

If suction power is still reduced take out the filter and clean mechanically or replace filter.

For certain applications, like wet pick up, it is recommended to turn off the automatic filter cleaning system. For details see chapter 3.1.

3.5 Antistatic connection¹⁾

CAUTION

The machine is equipped with an antistatic system to discharge any static electricity that may develop during dust pick-up.

The antistatic system is placed in front part of the motor top and creates an earth ground connection to the inlet fitting of the container. For proper function the use of an electrical conductive or antistatic suction hose is recommended. When inserting the optional disposal bag make sure the antistatic connection is kept.

3.6 Cooling air filter

To protect the electronics and motor, the machine is equipped with a cooling air diffusor. Clean the cooling air diffusor regularly.

For areas with a high concentration of fine dust in the surrounding air it is recommended to equip the machine with an optional cooling air filter cartridge to prevent dust from settling inside the air channels and motor. Contact your local sales representative.

CAUTION

If cooling air filter is clogged by dust the overload protection switch in the motor can be activated. In such case switch off the machine, clean cooling air filter and allow machine to cool for approx. 5 minutes.

3.7 Wet pick-up

CAUTION

The machine is equipped with a water level limit system which shuts off the machine when the maximum liquid level is reached. When this occurs, switch off the machine. Disconnect the machine from the socket and empty the container. Never pick up liquids without the water level limit system and filter in place.

Picking up liquids.

- Do not pick up flammable liquids
- Before liquids are picked up, always remove the filter bag/wastebag and check that the water level limit works properly.

- If foam appears, stop work immediately and empty the tank.
- Clean the water level limiting device regularly and check for signs of damage.

Before emptying the container, unplug the machine. Disconnect the hose from the inlet by pulling out the hose. Release the latch by pulling them outwards so that the motor top is released. Lift up the motor top from container. Always empty and clean the container and water level limit system after picking-up liquids.

Empty by tilting the container backwards or sideways and pour the liquids into a floor drain or similar. Put back the motor top to the container. Secure the motor top with the latches.

Heavy maneuvers can, by mistake, trigger the water level limiting device. Should this happen; turn off the machine and wait for 3 seconds to reset the device. Continue to operate the machine afterwards.

3.8 Dry pick-up

CAUTION

Picking up environmentally hazardous materials.

Materials picked up can present a hazard to the environment.

- Dispose of the dirt in accordance with legal regulations.

Remove the electrical plug from the socket before emptying after dry pick-up. Release the latch by pulling them outwards so that the motor top is released. Lift up the motor top from container. Filter: Check the filters. To clean the filter you can shake, brush or wash it. Wait until the filter is dry before re-starting dust pick-up. Dust bag: check bag to ensure the fill factor. Replace dust bag if necessary. Remove the old bag. The new bag is fitted by passing the cardboard piece with the rubber membrane through the vacuum inlet. Make sure that the rubber membrane is passing past the heightening at the vacuum inlet.

After emptying: close motor top to the container and secure the motor top with the latches. Never pick up dry material without filter fitted in the machine. The suction efficiency of the machine depends on the size and quality of the filter and dust bag. Therefore - use only Original filter and dust bags.

4 After using the machine

4.1 After use

Remove the plug from the socket when machine is not in use. Wind up the cord starting from the machine. The power cord can be wound up around the motor top or at the container or placed in the included hook, or fastening means. Some variants have special storage places for accessories.

4.2 Transport

- Before transporting the machine, close all the latches.
- Do not tilt the machine if there are liquids in the dirt tank.
- Do not use a crane hook to lift the machine.
- Do not lift the machine by the trolley handle *)

4.3 Storage

CAUTION

Store the appliance in a dry place, protected from rain and frost. The machine shall be stored indoors only.

4.4 Accessory and tool storage

For convenient transport and storage of accessories or tools, integrated rails are found on side of machine which allows fastening with straps or other means. A flexible strap and hooks are included on back of machine for attachment of suction hose or mains cable. For instruction see quick reference guide.

An optional adapter plate¹⁾ with attachment system can be installed on top of machine for fastening of 2-point or 4-point storage cases.

Remove the electrical plug from the socket before installing the adapter plate.

CAUTION¹⁾

Do not lift machine in adapter plate without having storage case safely installed. Note the weight and balance of the appliance in case of storage. Maximum weight of storage cases is 30 kg.

4.5 Recycling the machine

Make the old machine unusable.

1. Unplug the machine.
2. Cut the power cord.
3. Do not discard of electrical appliances with household waste.

As specified in European Directive 2012/19/EU on old electrical and electronic appliances, used electrical goods must be collected separately and recycled ecologically.

5 Maintenance

5.1 Regular servicing and inspection

Regular servicing and inspection of your machine must be carried out by suitably qualified personnel in accordance with relevant legislation and regulations. In particular, electrical tests for earth continuity, insulation resistance, and condition of the flexible cord should be checked frequently.

In the event of any defect, the machine **MUST** be withdrawn from service, completely checked and repaired by an authorized service technician.

¹⁾OEL=Occupational Exposure Limit, ²⁾Optional accessories / Option depending on model
Original instruction

At least once a year, a Nilfisk technician or an instructed person must perform a technical inspection including filters, air tightness and control mechanisms.

5.2 Maintenance

Remove the plug from the socket before performing maintenance. Before using the machine make sure that the frequency and voltage shown on the rating plate correspond with the mains voltage.

The machine is designed for continuous heavy work. Depending on the number of running hours – the dust filter should be renewed. Keep the machine clean with a dry cloth, and a small amount of spray polish.

For Dust Class L machines (with type designation VHS 40 LC, VHS 42 LC) following applies:

During maintenance and cleaning, handle the machine in such a manner that there is no danger for maintenance staff or other persons.

In the maintenance area

- Use filtered compulsory ventilation
- Wear protective clothing
- Clean the maintenance area so that no harmful substances get into the surroundings.

During maintenance and repair work all contaminated parts that could not be cleaned satisfactorily must be:

- Packed in well sealed bags
- Disposed of in a manner that complies with valid regulations for such waste removal.

For details of after sales service contact your dealer or Nilfisk service representative responsible for your country. See reverse of this document.

6 Further information
